Release Notes of Continuous Delivery

August 05, 2024

 Version 1.20.3 includes highest priority bugs and continuous delivery (CD) tasks

Here are the bug fixes below:

1. Edge Case - User who is redirected to reply to comment or post idea as comment from duplicates component and have access to milestones & tasks tab causing issues
2. Default tags option not working on pie chart or bar chart
3. When a user comments on an idea that has comments set to 'private' the activity log will track the comment but lists the user's name who is viewing the idea
4. Fix dashboarding issues that resulted from recent deployment of movable gadgets

Detailed Notes For Each Task:

- 1. Edge Case - User Who Is Redirected to Reply to Comment or Post Idea as comment from Duplicates component AND Have Access to Milestones & Tasks Tab Causing Issues**
 - When idea must be in a 'no action' stage, it should take user to the 'about tab'
 - Idea must have milestones and tasks section enabled and user must have permission to view milestones and tasks
 - When a user clicks on a comment it should take the user to about tab on reply to comment.
 - Tested and verified 
- 2. Default tags option not working on pie chart or bar chart**
 - For Pie Chart: When user selects tags option showing up as unspecified even though the tags do exist in the system.
 - For Bar Chart: No data is showing up even though there is data in the system

- Tags are now showing up as their actual label not as “unspecified”
- Tags are now showing up in the x-axis and the number of associated submissions with that tag should be shown on the Y-Axis.
- Tested and verified 

3. When user comments on an idea that has comments set to 'private' the activity log will track the comment but lists the user's name who is viewing the idea.

- Now when a user comments on an idea that has comments set to 'private' the activity log will track the comment but lists the user's name who is viewing the idea.
- Tested and verified 

4. Fix dashboarding issues that resulted from recent deployment of movable gadgets

- When new gadget created, the ordering of gadgets gets messed up / Changes ordering of all existing gadgets, now this issue is fixed
- Newly added gadgets will now show up in the row that has less gadgets in it
- User should not be able to move gadgets unless the dashboard view is in “Edit Mode”
- Tested and verified
