Ideawake

Release Notes of Continuous Delivery

August 29, 2024

🚀 Version 1.20.5 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. Custom Field Text "Response Option" Not Showing up in automations interface
2. Fix Visibility for Dashboard Pages - When "All Community Members" is Selected then "All Community Members" should actually be able to see and access the link
3. Fix Right click Issue onClick of Link Throughout Ideawake Application
4. Team Member Search Issue Not Usable
5. we're missing the "All community members" tag randomly on post challenge
6. Other printing optimizations
7. Bar Chart - Allow Admins to sort response options from most to least and least to most
8. Enable Right-Click Functionality for Improved UX
9. Idea is missing description - check database for any logs

Detailed Notes For Each Task:

1. **Custom Field Text "Response Option" Not Showing up in automations interface**
   - When triggers are made then the respective responses selected by the user must be visible in the multiple path's tree
   - Tested and verified ✅

2. **Fix Visibility for Dashboard Pages - When "All Community Members" is Selected then "All Community Members" should actually be able to see and access the link**
   - When user navigates to the challenge creation default selection/tag of all community members is visible
   - This default tag cannot be removed unless some other user is tagged as we have removed cross icon as well

- Tested and verified ✅

3. **Fix Right click Issue onClick of Link Throughout Ideawake Application**

   - Default right click browser menu appear when user navigates to the idea in tabular, cards and pipeline view
   - Title gets highlighted while idea is navigated
   - Tested and verified ✅

4. **Team Member Search Issue Not Usable**

   - On-search user list appears without lag and buggy flashing of user profiles is fixed
   - User readily searches first half of the user name and scrolls down the dropdown, no hinderance or flickering of profile avatars/names
   - Tested and verified ✅

5. **we're missing the "All community members" tag randomly on post challenge**

   - When user navigates to the challenge creation default selection/tag of all community members is visible
   - Tested and verified ✅

6. **Other printing optimizations**
   - Spacing is done by giving a slight margin of one inch across the page covering all sides
   - "Custom field" heading is removed from the pdf and now fall under the tags heading
   - Links of user profile and the challenge title are made clickable and redirects readily
   - Tested and verified ✅

7. **Bar Chart - Allow Admins to sort response options from most to least and least to most**
   - New sorting filter has been introduced and user can sort by the stats from highest to lowest and vice versa
   - Tested and verified ✅

8. **Enable Right-Click Functionality for Improved UX**

- Enhanced right click functions are added for ideas listing and their title selection
- Default browser options appear to open the idea
- Tested and verified ✅

9. Idea is missing description - check database for any logs

- Description consisted of time-taking links are catered with lesser load time
- Multiple links are being added with no lag except invalid links
- Tested and verified ✅
