Ideawake

Release Notes of Continuous Delivery

September 12, 2024

🚀 Version 1.20.6 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. Don't update assignee settings of existing ideas on stage settings page update unless admin changes assignee settings when editing stage settings page
2. Groups X-Axis on Bar Chart Not Working / Displaying No Results Even When It Should Be
3. Tags (Default Field) Not Updating When User Enters Value from "Bulk Updates" option on ideas list table view
4. Don't move all ideas in challenge to first stage in changed workflow when workflow is changed with existing ideas in challenge
5. Images on "recently posted" widget is broken on challenge home page when "additional brief" is enabled.
6. Challenge and Idea Settings Tab Visibility Settings on Submissions - Need to allow for users to be tagged when selecting 'specific community members' groups or users. Right now only groups can be selected and not users as well.
7. Take me to the same tab when I go from idea page modal to dedicated idea page

Detailed Notes For Each Task:

1. **Don't update assignee settings of existing ideas on stage settings page update unless admin changes assignee settings when editing stage settings page**
   - Assignee settings are updated when changes are made to "Stage Assignee Groups or Individuals" and when the stage is saved.
   - The assignee settings remain unchanged for the linked opportunities.

- Tested and verified ✅

2. **Groups X-Axis on Bar Chart Not Working / Displaying No Results Even When It Should Be**
   - Bar chart specifically with the groups on x axis and count of submissions on y axis will work fine
   - Tested and verified ✅

3. **Tags (Default Field) Not Updating When User Enters Value from "Bulk Updates" option on ideas list table view**
   - Tags are added via bulk option and user can add as many as per requirement
   - Tested and verified ✅

4. **Don't move all ideas in challenge to first stage in changed workflow when workflow is changed with existing ideas in challenge**
   - Ideas that are added before the workflow change remain associated with their original workflow.
   - No automatic updates occur for ideas in stages when a workflow is changed for a challenge.
   - Tested and verified ✅

5. **Images on "recently posted" widget is broken on challenge home page when "additional brief" is enabled.**
   - Images of ideas are populated by default when additional brief is enabled
   - Tested and verified ✅

6. **Challenge and Idea Settings Tab Visibility Settings on Submissions - Need to allow for users to be tagged when selecting 'specific community members' groups or users. Right now only groups can be selected and not users as well.**
   - Normal users appear when "Specific community members" dropdown is navigated
   - Multiple users when selected behave as it is as for single user no discrepancy is there regarding multiple users
   - Tested and verified ✅

7. **Take me to the same tab when I go from idea page modal to dedicated idea page**

- User stays on the same tab and there is no buggy redirections when undergoes some settings changes
- User stays on the same tab before and after the idea modal is enlarged
- Tested and verified ✅
