Release Notes of Continuous Delivery

September 24, 2024

 Version 1.20.7 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. When votes are enabled and votes are selected to be anonymous, the system still displays the user name who voted.
2. Standardize actions dropdown to add in missing actions on idea action dropdown button
3. Fix Popover Experience to Be Universal so users don't have popover disappear when they're hovering inside of them
4. Automation Action "Add or change custom field value" action not working
5. Allow user to edit a custom field on an idea from the ideas list table at community and challenge level by clicking on the entry
6. Allow users to export into XLSX vs. CSV on exports for ideas and for users exports
7. Bar Chart Sorting Returns Different Results Depending on the Number of
8. Co Submitter Can't Be Removed When Loading a Draft
9. Fix Edge Case With Coby's Recent PR for Hiding Fields
10. Add sockets to the ideas list pipeline page for stage changes so it updates real time without requiring user to refresh the page
11. Bucket name update in migrations of default images

Detailed Notes For Each Task:

1. When votes are enabled and votes are selected to be anonymous, the system still displays the user name who voted.
 - Option to make votes anonymous by default is enabled and votes are selected anonymously and appear as anonymous

- Tested and verified 
2. Standardize actions dropdown to add in missing actions on idea action dropdown button
 - The "Manage Collaborators" option opens the manage owners, team members, co-submitters modal.
 - Tested and verified 
 3. Fix Popover Experience to Be Universal so users don't have popover disappear when they're hovering inside of them
 - Pop-over no longer gets closed if user hovers outside the pop-up space for approx 350 ms
 - User clicks inside the popover and modal remains opened
 - Tested and verified 
 4. Automation Action "Add or change custom field value" action not working
 - Custom field value appear as it is as what it holds (the value)
 - Tested and verified 
 5. Allow user to edit a custom field on an idea from the ideas list table at community and challenge level by clicking on the entry
 - User can now edit the custom field embedded in an idea, previously this functionality was not in action
 - Tested and verified 
 6. Allow users to export into XLSX vs. CSV on exports for ideas and for users exports
 - User can export ideas having XLSX format
 - User exports are available in XLSX export as well
 - Tested and verified 
 7. Bar Chart Sorting Returns Different Results Depending on the Number of
 - Filtering via responses now show respective and correct results w.r.t the "number of values" filter applied
 - Verify that the sorting works well for either 5 values or no limit values
 - Tested and verified 
 8. Co Submitter Can't Be Removed When Loading a Draft
 - Co-submitters can be removed now via draft

- Tested and verified 

9. Fix Edge Case With Coby's Recent PR for Hiding Fields

- Empty fields which and the parent fields which are untouched by the user and they have further rules are not visible to anyone including admins
- Now the rules are applied and empty fields appear if they fall under rule
- Tested and verified 

10. Add sockets to the ideas list pipeline page for stage changes so it updates real time without requiring user to refresh the page

- Stage changes are done in real time without refreshing the page e.g., now the stage gets updated to "In Progress" in the pipeline view in real time without page refresh.
- User stays on the same tab before and after the idea modal is enlarged
- Tested and verified 

11. Bucket name update in migrations of default images

- Default images tweaks are done and works fine
- Tested and verified by the dev
