Ideawake - Release Notes of Continuous Delivery

May 12, 2025

🚀Version 1.3 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. Created separate views for mobile for notifications and action items
2. Rules now delete when the admin deletes rules in stages of workflow
3. Users display as "pending" users even when they are "active" users in a community - resolved
4. Decimal places in numerical custom fields now recognized
5. When admin assigns a stage on pop-up modal, the system pop-up for unsaved changes no longer appears
6. Added missing activity participation analytics in challenge modal
7. Comma is added in case of custom field = unformatted number

Detailed notes for each task:

1. Created separate views for mobile for notifications and action items
   - When a user clicks on the notifications or action items dropdown, it now redirects the user to a separate page that doesn't cause a disturbance on the page
   - Tested and Verified ✅

2. Rules now delete when the admin deletes rules in stages of workflow
   - When deleting any new or existing rule and clicking on the save changes button - rules delete
   - Tested and Verified ✅

3. Users displayed as "pending" users even when they are "active" users in a community - resolved
   - Whenever a new community is created, it displayed active user status as pending
   - Tested and Verified ✅

4. Decimal places in numerical custom fields now recognized
   - Decimal points should be accepted when user types them in manually in a numerical custom field
   - Tested and Verified ✅

5. When admin assigns a stage on pop-up modal, the system pop-up for unsaved changes no longer appears
   - When a user makes changes to 'scorecard stage' (i.e Assign user to Ideas) and Off-Clicks, the confirmation modal was popping up. Now user is be able to 'X' out on the idea page modal and will see the ideas list page without having to interact with the confirmation popup modal
   - Tested and Verified ✅

6. Added missing activity participation analytics in challenge modal
   - When a user submits a star rating in an idea, the following user submission displays in the challenge analytics & gadget counter:
     - Number of Star Rating
     - Completed Rating
     - Average Star Rating
     - Percentage of User Submitted Rating.
   - Columns for above have been added in the export sheet, displaying user star rating submission data
   - Tested and Verified ✅

7. Comma is added in case of custom field = unformatted number.
   - While submitting data in the number custom field, comma is not added in case of an unformatted number
   - Tested and Verified ✅
