Ideawake - Release Notes of Continuous Delivery

June 4, 2025

🚀Version 1.3 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. Clicking tags on comments redirects users to a page with 0 results. Now returns correct results
2. Fixed edge cases with anonymity on the 'User Profile' page
3. Deployed mobile navigation fixes
4. Fixes for next / previous buttons
5. Admins can now relabel the naming of "challenges" to other names which updates everywhere on the platform
6. Changed messaging on 'new ideas added to workflow' notification on notification drop down
7. Turned on 'new submission digest' email by default for **newly** created communities
8. Turned rest of static text on Ideawake into variables (Relates to Default Languages)
9. Disabling attachments now live

Detailed notes for each task:

1. Clicking tags on comments redirects users to a page with 0 results. Now returns correct results
   - When user clicks on the tag associated with #mention in the comment body, they should redirect to the ideas list page, showing the ideas linked with tag
   - Tested and Verified ✅

2. Fixed edge cases with anonymity on the 'User Profile' page
   - The other users will not be able to see any anonymous activity performed by a user in their profile activity summary section
   - Tested and Verified ✅

3. Deployed mobile navigation fixes
    ○ The screen size to switch to mobile navigation has been modified. Considering our default menu length the values for switching to mobile menu have been increased from 820 to 1190
    ○ Tested and Verified ✅

4. Fixes for next / previous buttons
    ○ When off clicking outside the Idea model, it closes the idea in a single click without a pop up appearing
    ○ Tested and Verified ✅

5. Admins can now relabel the naming of "challenges" to other names which updates everywhere on the platform
    ○ Users can rename the challenge name from 'Appearance Settings' and it will display in the relevant places on the platform
    ○ Tested and Verified ✅

6. Changed messaging on 'new ideas added to workflow' notification on notification drop down
    ○ Update the notification message to 'Thanks for sharing! Your {{postType}} has been received'.
    ○ Tested and Verified ✅

7. Turned on 'new submission digest' email by default for **newly** created communities
    ○ Whenever a new community is created, the 'New Submission Digest Email' is now enabled in the 'Manage Email' settings.
    ○ Tested and Verified ✅

8. Turned rest of static text on Ideawake into variables (Relates to Default Languages)
    ○ Changed all static texts in all of the platform preferred languages
    ○ Tested and Verified ✅

9. Disabling attachments now live
    ○ Added a toggle to disabled attachment in the post type settings while posting a new idea or in the about section of an idea
    ○ Tested and Verified ✅
